

TEST POOL

The 8m deep indoor test pool is located inside COLMAR facilities in La Spezia, it is equipped with instrumentation for acoustic calibration, 4T crane, conditioned laboratory. It can provide a flexible approach to the most demanding testing requirements for wide range of underwater equipment from ROV's to hydrophones.

Pool Dimension:	14m (length)
	11 m (width)
	8m (depth)
Crane load:	4T
Conditioned Laboratory:	8x3m
Acoustic calibration equipment*:	Suitable for low frequency calibration
	Automatic rotating pole for directivity patterns
	Range of calibrated reference hydrophones and transducers
	Data acquisition hardware
	Data processing software
Services:	- Underwater acoustic equipment testing and calibration
	- Rov vehicle testing
	- Rov pilot training
	- Auv testing
	- Pumps testing
	- Seal test of large equipment

*ask for more information about acoustic calibration services
